

PILOT REPORT
OAXACA 2014

Saturday, the 4th of January 2014, Marian and I departed by commercial air for Oaxaca, Oaxaca Mexico. Oaxaca is a city of 300,000 in the state of Oaxaca, southeast of Mexico City. It's located in a large valley at the 5,000' elevation with towering mountains jetting almost straight up another 2,000'. Our 9 pm arrival allowed us to see a panoramic view of the city lights as we descended below the mountains for landing.

We were met by Garrett (Marian's son) and two of our grand kids. Our purpose here was to minister another seven hours to the southeast in Colonia Juarez, then on to the mountain community of Lachiguiri, and then down the mountain toward the Pacific coast to Juchatan. Six nights of outreach and I had my message ready. Well you know what happened next.....yeah, God changed my message! God loves the flexible. God's message was Heal the sick, Cast out demons, Preach the Kingdom of God!

So on Monday morning Garrett and I headed out to scorpion country while Marian stayed in Oaxaca to minister and love on family. Our host for the first four nights was Jose Eli and his family. When ministering in this part of Mexico you stay with whoever invited you no matter how poor they are. Each day we were given more and better food than they would ever eat. They felt it was an honor for them to have us in their home and they constantly showed it with love even though they couldn't afford it. To them it was a sacrifice unto God. It was our priviledge to be their guests.

As we sat around the breakfast table each morning the day and evening was planned out. We would sometimes travel long distances to pray for the sick and get back in time for the evening's outreach.

OAXACA 2014

Other times we would just walk through a near by village, praying for the sick as we would find them. We would pray for the sick and God would heal them. We would command for the demons to leave in the name of Jesus and they would go by the power of God. Then we would Preach the Kingdom and watch men and women weep bitterly. What an awesome sight when you do it His way. Each night Garrett and Jose Eli would lead worship, I would then give the message and after we would ask for those to come forward who needed prayer. They came, we prayed, and God healed.

On the fifth day we were off to Lachiguirí. We had a plan but God had a better one. As we arrived at the mission house, a place where Garrett and his family or team have available to use, we noticed that part of the roof had been torn off from high winds exposing the interior and it's furnishings. After finding materials and sealing off the roof we headed out to Nelly's church where Garrett always has an open invitation to minister. But Nelly and most of the church were off into the mountains on a missions trip of their own. Praise God! Yet God had something special for us tonight. We went to visit a neighbor and they told us of a couple and their twin boys who desperately needed prayer. Thank you Lord, that's why we are here. We followed the couple to a neighborhood and as we walked into their home we could see why they were so desperate.

As the couple held the 3 year and 8 month old twin boys they told us the story. The twins were born healthy and at about a year old they started walking. But then, they became ill and for some reason the parents took them to the traditional doctor! That is the modern name for witch doctor! Both boys had developed Cerebral Palsy. It was so sad to watch the boys staring into space

never blinking their eyes. The parents talked for more than two hours. They needed to talk and we let them. We asked if we could pray for them and they readily accepted. We must have prayed for more than an hour, lifting up the twins as well as the parents. We prayed fervently by faith expecting complete healing but everything in God's timing. We then noticed the father moving his finger from side to side in front of the boy's face. A big smile came over the father's face and he said that he had never done that before. We looked at each other and asked, "Done what?" "Look he is following my finger." he said. It wasn't until then that he told us both boys were completely blind. That encouraged us and the parents. The parents then told us that every time a Christian came over to pray for the boys there was always some noticeable improvement. That encouraged me to go after the demonic world breaking off authority and power left behind from their visit to the witch doctor. They readily accepted the prayer and we further encourage them that God was still in the healing business and in God's timing His will would be done. Healing is a process, where as, Miracles are when healing takes place immediately.

Day six we headed for the city of Juchitan. As soon as we arrived we were fed a big lunch (maybe we just look hungry). But before lunch was over we had another call for prayer. A lady came to the door asking that we would go with her to her friend who was in desperate need. We were out the door in minutes zigzagging our way through the city until we arrived at her friends house. Upon arrival we were introduced to her friend and got to know her a little bit first. Next we asked what she need prayer for and this was her story. A little over a year ago she had surgery for cancer in the area of her stomach and that went well. However, during the

PILOT REPORT
OAXACA 2014

radiation treatments they burned her intestines so the doctors removed her intestines and sent her home to die. After a few more questions we went after healing with great fervor. We stopped several times during pray to see how she was doing and this is what she said. “As soon as you started praying for me I felt a great peace come over me, but that’s not all. I feel heat in the whole front of my body.” All we could do was smile. We have seen this so many times. When we pray for someone we always stop after praying for awhile and ask how they are doing. We never make any suggestions but listen carefully to what they have to say about how they are feeling. 95% of the people that we pray for feel heat in the affected area before they get healed. We can’t make this stuff up. This is the way it happens.

So when God sets up a pattern that is consistent, we just follow. It’s not us doing the healing anyway, it’s Him. As we left she was encouraged and so were we.

There was an evening service waiting for us at Rosalita’s church in downtown Juchitan. It was mostly a young church but there were a few people in their golden years that I could relate to. By the time everything got going there were 75 to 80 people there. I went though the same message, heal the sick, cast out demons, preach the kingdom of God with a incredible results. All but maybe five came forward for prayer. Because of so many young people present, I wanted this to be a teaching session so as each person came forward I asked them their name and what their prayer need was so that all could hear. Then I prayed for a few minutes and then asked, “How are you doing?” and listened as did the congregation with me. 100% of the people that were prayed for felt heat and ALL but one was completely healed on

PILOT REPORT
OAXACA 2014

the spot while everyone watched. That is God's testimony of love and grace. The one who wasn't healed felt cold in his hand and then great heat where he had been electrocuted (those were his words).

The next thing that happened was a lady in the congregation came forward crying. She said she just received a vision of the young man's hand and it was completely healed. We prayed for him one more time knowing God was again in the process of healing, and we were not questioning His timing but praising His Presence and Glory in our midst.

The healings we witnessed this night are too numerous to talk about them all, but here are a few results.

1. A lady who came forward for prayer for a hernia, eyes hurting and a head ache was prayed for. I first prayed for her hernia and then three times for her head ache until it went completely away. Then I asked about her head ache and she said it was completely gone. Because there were so many people waiting for prayer I started to the next person. But she became very excited and telling Garrett something in Spanish in which Garrett responded, "OH MY GOSH. OH MY GOSH!" I asked, "What's Up?" Garrett said, "As soon as you started praying for her something "shrunk" in her stomach. She said her hernia is gone! I got so busy with her head ache I forgot all about her hernia and God quietly healed her.
2. A heavy young man came forward wanting prayer for sin he felt he still had in his life. The Pastor who was standing by said this young man first came to the church about a year ago. He had been involved in working for the drug cartel. He also had a

PILOT REPORT
OAXACA 2014

demon that the church prayed out. As I started praying for him I sensed something holding him back. I gently had my hand on his chest and he was slowly backing away from me. I stopped praying and asked how he was doing. His answer was, "I have fear". I knew exactly what that was, so I laid my hand on his chest again and pointing outward I said "GET OUT NOW IN THE NAME OF JESUS!" I then asked him again, "How are you doing?" His answered, "GREAT!" I asked, "Any more fear?" He replied, "NO! IT'S GONE!" By the power of the Holy Ghost it's gone.

The Bible tells us we have been given authority over demons, but so few practice it. The more we do this the more we put ourselves in the position of authority through Christ. There were many ,many more cases that night, all were special and all were real because God showed up. It was 1:00 am when we finished that night, but sleep came easy because we were tired. Thank you for reading this testimony through because it is a testimony about what God can do through ANYBODY! I am an ANYBODY and willing to be vulnerable and be used by God. I believe every time this testimony is read the angels that are around God's throne CHEER for joy, honoring the ONE Who made all this possible for those who "PRESS INTO GOD FOR MORE".

Because of the love of the Father.
